

Sustainability Statement

Sustainability is core to KaMin's Vision, a key ingredient in KaMin's Values and the foundation of KaMin's Mission.

KaMin's Vision: Be the Most Admired Kaolin Company in the World

Our Values

Integrity – We place Honesty and Integrity above all else

Customers - We will stay focused on Satisfying our Customers Current and Future Needs

Partnership – We will work Innovatively as Team within KaMin and with our Customers

Profitability – Build a Sustainable Company delivering long term value to Shareholders

Safety – We will foster a Culture of Safety Excellence

KaMin's Mission: *Value from the Ground Up*

KaMin Emphasizes Sustainability By Focusing On Four Major Areas:

- **Social Responsibility:** Recognizing community needs as well as those of its business partners, customers, and employees.
- **Protection of the Environment:** Leaving a light footprint in all mining and processing operations. Reclaiming mined land to a productive state capable of producing sustained timber yields comparable to non-mined lands. Beginning the mining process with the end state in mind.
- **Prudent Use of Natural Resources:** Moderating consumption of all natural resources through recycling, process improvements, and new product innovation that minimizes consumption and improves our efficiencies. This includes an operations and reserves philosophy of using as little as possible to produce as much as possible.
- **Economic Strength Long Term:** Managing our business today with a focus on tomorrow ensures that KaMin is doing the right things for our long term success.
