## **Wrens Plant Celebrates 50 Years**

**Wrens, GA. October 25, 2016** – More than 160 employees and guests gathered at a luncheon celebrating fifty years of the Wrens operation. Charles Newsome, Plant Manager, reflected on the occasion, “The Wrens Plant is focused on fine particle high brightness kaolin, and our technology, quality and teamwork have contributed to make KaMin the world leader for this type of clay. This has been the key to our past success and a sustainable future for our operation.”

Guests at the celebration viewed a video featuring reminiscences by retired employees, including the two original employees of the Wrens operation. Town officials and suppliers recounted the contributions by the Wrens plant to the community and their long term success. Current employees reflected on the values of the Company, their pride in being part of the team, and desire to be part of its future success.

Harlan T. Archer, President, remarked, “We are so very proud of the fine work done by our employees through the years at the Wrens plant. Today, we ship Wrens’ products to hundreds of customers in fifty countries around the world, who are using our clay to make countless different products that we use every day. It is exciting to see the success we have achieved during our first fifty years, and I look forward to watching the continued growth and future achievements from this great team.”

**About KaMin LLC and CADAM S.A.** – With over 80 years of experience in mining and processing kaolin clay, KaMin delivers value to customers worldwide with high quality kaolin solutions for the most demanding applications. KaMin mines and produces its kaolin in the US at three Georgia plants – Macon, Sandersville and Wrens – and at its CADAM S.A. subsidiary in Brazil. KaMin has been recognized not only as a leader in product quality and export volumes, but also in its safe mining practices for many consecutive years.
