KaMin Integrates Sustainability Initiative Across All Operating Sites

MACON, GA — August 28, 2023 — KaMin announced today the integration of our Sustainability Council across all operating sites around the world. Formed in 2021, the express purpose and commitment of the council is to develop a plan to become a leader in sustainability as part of our vision to be a global leader in performance minerals for everyday life. To achieve that vision, the council works to embed actionable initiatives including:

- Deploying technology to reduce our overall greenhouse gas emissions and water consumption.
- Continuing to improve our mining and manufacturing practices by optimizing our footprint and setting the industry standard in resource efficiencies and reclamation practices.
- Partnering with our suppliers to ensure they are aligned with our strategic goals and providing complementary offerings to help us achieve our targets.
- Engaging our customers collaboratively to ensure we are focused on enabling the most sustainable products for the future.

At the onset of this journey, KaMin chose Ecovadis to benchmark our progress. Ecovadis assesses our strengths and improvement areas, tracks progress, and benchmarks our sustainability performance against thousands of other companies in a myriad of industries. KaMin's current silver ranking places us in the top 89th percentile of all Ecovadis participants, and we are focused on achieving gold status (95th percentile) as the next milestone in our sustainability commitment.

We are proud of the work that our team is doing and are excited that all of KaMin is aligned around our aspiration to environmental excellence. These actions will enhance our ability to provide innovative product solutions for our global customers' increasing needs for eco-sensitive products. Working together with all our stakeholders, we will create a more sustainable future.

About KaMin - A recognized leader in mineral solutions, KaMin has over 95 years of experience in delivering innovative product solutions in a broad spectrum of end-use markets. The company mines, produces, and distributes kaolin products from its twelve production, processing, and converting facilities throughout North America, South America, and Europe. Through partnership, KaMin creates performance mineral solutions for our customers, driving value from the ground up. For more information, visit www.kaminsolutions.com.
